#1

#1

Los ganchos del entrelazado #1 están cardados y galvanizados. El entrelazado viene en cajas de 24 piezas. Tamaño disponible 1G-6" (24 por caja).

36VL-7 CLIPPER

36VL-7 Clipper es la herramienta para grapas ideal para el usuario con solo unas pocas bandas transportadoras, al tiempo que brinda la confiabilidad y el rendimiento de un empalme de máquina. También es fácil de usar y económico. Simplemente coloque la grapadora en un tornillo de banco, cargue los ganchos, inserte la banda y cierre el tornillo de banco. La placa de presión incorporada exclusiva asegura un perno consistente para empalmes duraderos.

El retenedor de gancho Acusteel™ produce un perfil de bucle óptimo para un rendimiento máximo de empalme.

Los Vise Lacers (grapas) están disponibles para todas las series de tamaños de gancho o grapas Clipper en anchos de hasta 10 "(250 mm).

Las bandas más anchas se pueden atar en múltiples operaciones con la característica de grapas continuos fácil de usar.

PLANCHADORA DE CAMA

La gama de productos está diseñada para maximizar la calidad y el funcionamiento, produciendo excelentes resultados de planchado para todos los tipos de ropa de cama. Los productos de Teclav se preocupan por el rango de fieltro, con su alta permeabilidad al vapor y fibras vírgenes, las cuales ayudan a incrementar la resistencia a la hidrólisis y se adaptan a todo tipo de temperaturas. El mismo nivel de calidad aplica a nuestro rango completo.

Ofrecemos bandas de alimentación tejidas y no tejidas, así como bandas de máquinas para doblar (folders) tejidas y antiestáticas que tienen una alta resistencia a la abrasión, resultando en menos tiempo para reemplazar bandas rotas.

Nuestra extensiva gama de cintas guía de poliéster, meta-aramida poliéster y 100% meta-aramida atienden cualquier necesidad. Las bandas también se pueden suministrar confeccionadas con clips y pins a la medida (que encajan).
